### Subsystem Refurbishment

An integral component of our comprehensive subsystem refurbishment program, NxEdge delivers heat exchangers and chillers refurbished to OEM specifications.

We possess the experience, inventory, and subsystem knowledge to be a key partner, helping customers meet factory management challenges in a highly cost competitive environment.

#### Customer Benefits

- Significant savings over new OEM products
- Superior convenience and efficiency
- One-stop solution: cost savings with warranty
- Flexible, high-value programs

#### Key Program Features

- Heat exchangers and chillers configured to customer specifications
- Units are refurbished and tested to meet or exceed OEM specifications
- Six-month warranty against defects in material and workmanship from ship date
- Same day shipment on replacements during normal business hours
- Onsite backup units available for consignment
- Core credit issued when complete, rebuildable core received\*
- All heat exchangers and chillers are tracked via serial number/model number
- Test results provided on every unit

\* Core exchange heat exchangers and chillers must match configuration, or additional charges may apply.

### Heating and Cooling Products

- In-house refurbishment capabilities
- AC&R certified technicians
- Fully refurbished with warranty available

Chillers	Heat Exchangers
Edwards TCU 40/80	AMAT 0
LAM TCU 40/20	AMAT 1
M&W Dual Channel	Steel Head 0
NESLAB HX 150 Series	Steel Head 1
NESLAB HX 300 Series	NESLAB System III

### Value-Add Programs

NxEdge offers a range of value-add programs to extend use and optimize subsystem performance.

#### Roll Over Repair

Allows for the planned maintenance or replacement of subsystems during major projects or on an occasional basis.

#### Emergency Stocking

We carry or consign emergency stock on-hand, ready for service and shipment at the customer's request.

#### Core Exchanges

We will pay for the trade-in of old cores and apply the discount at the time of receipt.

#### Custom Designed Programs

We will work with customers to design a customized support program that will meet planned or emergency needs.
