About NxEdge™

NxEdge products and services provide customers with an extra edge in the highly competitive semiconductor industrial market segment. At the core of our business, the NxEdge philosophy of working extraordinarily close with our customers delivers the right solution at the right time for the right application.

While other companies may innovate with the customer in mind, we innovate with the customer on site -- or at the customer's site. At NxEdge, it's not one size fits all. Instead, we focus on producing maximum competitive leverage for a defined set of strategic customers.

Secondary Market Group

Operating out of Austin, Texas, NxEdge Secondary Market Group features refurbishment and redeployment of equipment, subsystems, and spare parts for semiconductor customers worldwide.

CUSTOMER FOCUS We have extended our customer-based approach to deliver innovative, cost-effective improvements to our customers. Our growing portfolio of equipment and subsystem refurbishment solutions, together with an expanding online spare parts offering, are enabled by our scalable, systems-based methodology.

REFURBISHED EQUIPMENT NxEdge provides refurbishment services to like-new condition for advanced production equipment, specializing in Novellus Concept One CVD systems. We offer a full range of OEM upgrades and enhancements to improve system performance.

ROBOT REFURBISHMENT An extension of our Novellus CVD refurbishment program, we provide complete one arm robot refurbishment and testing to OEM specifications. The program offering includes refurbishment, exchange, parts, and replacement of one arm robots.

NEW SURPLUS OEM PARTS NxEdge features the largest on-hand inventory of new surplus OEM parts at around 50 percent off the current OEM list price. Since these are new OEM parts, no additional qualification is required. Components are gathered from factories around the world, thoroughly inspected, catalogued, and stocked in a climate-controlled 22,000 sq ft section of our Austin, TX, facility.

Web-Based Inventory Search In addition to knowledgeable sales staff, we offer convenient, 24-hour access to our North America, Western Europe, and Asia warehouse inventory through our fully-searchable online system at nxsemi.com.

REFURBISHED SUBSYSTEMS Refurbishment services for a wide range of subsystems, including pumps, chillers, heat exchangers, and RF generators to meet or exceed OEM specifications at significant cost savings. Take advantage of our flexible stock arrangements and other custom programs designed to help optimize your subsystem use.

PRE-OWNED EQUIPMENT Redeployment solutions for a broad range of pre-owned equipment, all owned or controlled by NxEdge at our own facility. In addition, we offer value-add services, such as upgrades and testing, to enhance performance and optimize equipment utilization. NxEdge supports the redeployment of equipment manufactured by Applied Materials, Hitachi, KLA/Tencor, Lam, Nikon, Novellus, TEL, and more. View our full equipment inventory at nxsemi.com.
